REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 12-28, 33 and 34 are allowed. The prior art fails to teach or suggest 'an isolated and/or purified nucleic acid sequence encoding a fusion protein comprising at least one target peptide linked to a fusion protein carrier protein, the fusion carrier protein *consisting of* an amino acid sequence set forth in SEQ ID NO: 14'. While the full-length *S.aureus* nuclease protein was described in the prior art, there is no teaching or suggestion of a carrier protein consisting of an isolated nucleic acid sequence encoding the amino acid sequence set forth in SEQ ID NO: 14. SEQ ID NO: 14 is 117 amino acids in length and encoded by a 351 length DNA sequences. The instant claims were amended to the closed language "*consisting of* an amino acid sequence as set forth in SEQ ID NO: 14" and does not encompass the full-length *S.nuclease* protein or larger fragments of that protein. Murray et al teach the full-length protein as a chimeric protein with inert carriers, but does not teach or suggest the use of the particular claimed fragment or its use as a carrier. Kovacevic teach the full-length *S.aureus* nuclease protein and gene, but do not teach the particular fragment or its use in a fusion construct. The prior art 'cited, but not relied on' in the prior Office Action, e.g., US Patent No. 5,834,233 and WO 95/10614 also do not teach or suggest the use of the particular claimed fragment or its use as a carrier, but, instead, teach much larger fragments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
